

LAUNCH BLUEPRINT · 2026

Market Launch & Google Ads Strategy

A focused route from school pilot to repeatable growth for vegetarian student lunches in Tamil Nadu.

Prepared 5 August 2026 · Internal planning document

EXECUTIVE RECOMMENDATION

Win one neighbourhood before launching four cities.

LunchBox should begin as a tightly controlled B2B2C pilot: secure 2–3 schools in one Chennai delivery cluster, earn parent trust, prove repeat ordering, and only then expand.

The commercial reality: at ₹39 per meal, paid acquisition for a single order is unlikely to work. Marketing must lead parents toward weekly plans and schools toward campus-wide partnerships.

2–3

Pilot schools
One kitchen and one compact Chennai service area.

50–100

Initial students
Enough volume to validate operations without overextension.

4–6

Weeks to validate
Measure repeat orders, satisfaction and delivery reliability.

₹30k

Ads test ceiling
A controlled first-month validation budget, not a scale budget.

Positioning

For parents of students in grades 6–12, LunchBox offers convenient vegetarian school lunches, ordered online and delivered as labelled packs to participating campuses.

Primary audiences

Audience	Need	Message	Conversion
Parents	Convenience and confidence	Simple weekly ordering for a participating school	Completed weekly order
School management	Reliable, manageable service	Structured pilot with consolidated campus delivery	Qualified school meeting
Coordinators	Operational clarity	Named packs, manifests and defined support	Pilot approval

Paid traffic begins only after trust and fulfilment are real.

Current application warning: school names, ratings, “2,000+ parents,” nutrition language and checkout behavior appear to be demo or placeholder content. Advertising those elements before verification creates trust, policy and compliance risk.

Product

- ☐ Real onboarded schools
- ☐ Working payment or confirmation
- ☐ Usable “Request my school” form
- ☐ Correct broken ₹ and punctuation characters
- ☐ Mobile checkout fully tested

Trust

- ☐ Real food photography
- ☐ Verified testimonials only
- ☐ Business address and support number
- ☐ Delivery, cancellation and refund terms
- ☐ Privacy policy and consent language

Food operations

- ☐ Applicable FSSAI registration/license
- ☐ Ingredients and allergens documented
- ☐ Packaging and temperature SOPs
- ☐ Batch traceability and recall process
- ☐ Qualified review of nutrition claims

Measurement

- ☐ Google Analytics and Ads tag
- ☐ Order value captured
- ☐ Campaign parameters retained
- ☐ Test orders excluded
- ☐ Weekly performance dashboard

Claim discipline

Use factual descriptions such as meal contents, price, participating school and delivery schedule. Do not advertise ratings, parent counts, nutritional benefits, “nutritionist planned,” “fresh,” or safety superiority until each claim is documented and defensible.

Food claims should be reviewed against FSSAI’s Advertising and Claims Regulations:

https://fssai.gov.in/upload/uploadfiles/files/Compendium_Advertising_Claims_Regulations_04_10_2022.pdf

Readiness gate: no verified fulfilment, no paid launch.

Schools create access. Parents create recurring revenue.

1. Acquire the campus

Approach school owners, principals, administrators and parent committees with a limited pilot proposal. Provide tasting samples, menu details, operating procedures, delivery windows, escalation contacts and applicable food-safety documentation.

2. Activate parents through trusted channels

Give each participating school a dedicated landing page and QR code. Launch through the school’s official parent communication, then use WhatsApp reminders for weekly menus and cut-off times with appropriate consent.

3. Sell plans, not isolated meals

Offer	Illustrative price	Role
One-meal trial	₹39	Remove first-purchase friction
Three-day plan	₹117	Flexible entry bundle
Five-day plan	₹195	Primary weekly conversion
Four-week plan	₹780*	Build predictable demand

*Illustrative, before holidays, fees or promotions. Final pricing must follow actual unit economics.

4. Build referrals after service quality is proven

Potential offer: when an existing and referred parent both complete a five-meal order, each receives one complimentary meal. Launch only after validating contribution margin and abuse controls.

Channel allocation

Channel	Effort	Purpose
School partnerships	35%	Campus access and trusted endorsement
Parent referrals	20%	Lower-cost acquisition
WhatsApp/CRM	20%	Menu communication and retention
Google Search	15%	Capture existing intent
Tastings/events	10%	Build product confidence

Expansion gate: repeat ordering and delivery reliability must hold before adding a city.

Start with high-intent Search, split by buyer.

Do not begin with Display, YouTube or Performance Max. Search gives tighter control while the business is learning which locations, schools and messages convert.

Campaign	Daily budget	Goal	Landing page
Parents · Chennai	₹700	Weekly meal order	School/location-specific menu
Schools · Chennai	₹300	Qualified enquiry	School partnership page
Total	₹1,000	Approx. ₹30,000 maximum for month one	

Initial settings

- Google Search Network only; disable Display expansion.
- Target only genuinely serviceable Chennai neighbourhoods.
- Use “Presence” location targeting: people in the target area.
- Run English and Tamil campaigns separately when both landing-page versions exist.
- Test 6–9 AM and 6–11 PM, then optimize from conversion data.
- Begin with Maximize Clicks and a cautious CPC ceiling; move to conversion bidding only after sufficient genuine conversion data.
- Target adults and school decision-makers. Do not design personalized targeting toward children.

Parent keywords — phrase and exact match

“school lunch delivery” · “school lunch service chennai” · “vegetarian school meals” · “kids lunch delivery chennai” · “school meal subscription” · “lunch delivery to school” · “weekly school lunch plan”

Negative keywords

free · government · midday meal scheme · jobs · recipe · steel lunch box · tiffin box · office lunch · catering jobs · franchise · wholesale

School-partnership keywords

“school meal provider chennai” · “school catering service chennai” · “school lunch catering” · “student meal provider” · “vegetarian school caterer”

Google restricts ad personalization for children; keep campaign targeting parent- and school-oriented.

School Lunches in Chennai | Vegetarian Meals From ₹39

Pre-order vegetarian school lunches for grades 6–12. Check your school today.

Headlines — maximum 30 characters

1. School Lunches in Chennai
2. Vegetarian Meals From ₹39
3. Weekly School Meal Plans
4. Lunch Delivered to School
5. Sealed & Labelled Meal Packs
6. Made for Grades 6–12

7. Order This Week's Lunches
8. LunchBox School Meals
9. Simple Ordering for Parents
10. Check If Your School Is Listed
11. Choose One Day or Five
12. Freshly Prepared School Meals*

*Use only after the operating definition and evidence for "freshly prepared" are established.

Descriptions — maximum 90 characters

1. Pre-order vegetarian school lunches for grades 6–12. Meals start from ₹39.
2. Labelled meals delivered to participating schools. Check your school today.
3. Choose one day or the full week. See the menu, ingredients and delivery details.
4. Serving selected Chennai schools. Order this week's lunches online.

Recommended assets

- **Sitelinks:** This Week's Menu; Check Your School; Ingredients & Allergens; How Delivery Works.
- **Callouts:** From ₹39 Per Meal; Vegetarian Menu; Labelled Packs; Participating Schools.
- **Structured snippet:** Plans: One Day, Three Days, Five Days.
- **Images:** only real meals and real packaging; avoid stock imagery that misrepresents delivery.

Google supports up to 15 RSA headlines and four descriptions. Assets may appear in varied combinations.

Lead with a controlled pilot and operational clarity.

School Meal Partner Chennai | Request a School Tasting

Explore a structured vegetarian lunch pilot with coordinated campus delivery.

Headlines

1. School Meal Partner Chennai
2. Lunch Programs for Schools
3. Vegetarian Campus Meals
4. Labelled Student Meal Packs

5. Request a School Tasting
6. Weekly Menus for Grades 6–12
7. Campus Lunch Delivery
8. Talk to the LunchBox Team

Descriptions

1. Explore a structured vegetarian lunch program for your school. Request a tasting.
2. Weekly menus, labelled packs and coordinated campus delivery for grades 6–12.
3. Start with a limited school pilot. Discuss safety and delivery schedules.
4. Help parents pre-order while your campus receives consolidated deliveries.

Lead qualification form

Collect school name, area, contact role, phone, email, approximate student count, current lunch arrangement, preferred meeting date and consent to contact. Do not collect student-level data in this form.

Sales follow-up

1. Respond within one business hour during operating hours.
2. Confirm serviceability and approximate volume.
3. Schedule decision-maker discovery and tasting.
4. Provide compliance pack and written pilot scope.
5. Agree success criteria, support ownership and launch date.

Primary conversion: qualified school meeting. Secondary conversion: tasting booked.

Optimize for retained families—not cheap clicks.

Required conversion events

Event	Priority	Value
order_completed	Primary	Actual transaction value
weekly_plan_ordered	Primary	Actual plan value
school_lead_submitted	Primary, schools	Qualified lead estimate
school_check / school_request	Secondary	No bidding value initially
checkout_started	Diagnostic	Funnel measurement
repeat_order	Business KPI	Actual order value

Maximum acquisition cost

Gross profit per meal × expected meals per parent – fulfilment/support allowance – target profit.

Weekly decision dashboard

- Spend, impressions, clicks and search terms
- Completed orders and qualified school leads
- Cost per first parent and cost per qualified school lead
- Average order value and weekly-plan share
- Four-week parent repeat rate
- Cancellation, refund, late-delivery and support rates
- Contribution margin after kitchen, packing, delivery and payment fees

Optimization rules

- Review search terms twice weekly and add irrelevant queries as negatives.
- Pause locations that cannot be served consistently.
- Do not raise budgets while tracking, payment or delivery data is incomplete.
- Scale only when incremental orders remain contribution-positive and repeat rate is healthy.

Google Ads conversion guidance: <https://support.google.com/google-ads/answer/16560108?hl=en>

Measurement principle: a conversion is valid only when the order can be fulfilled.

From operational readiness to controlled growth.

Period	Actions	Exit condition
Days 1–14	Confirm schools and kitchen; complete compliance review; implement payment, policies and analytics; replace placeholders; test mobile ordering.	Real orders can be accepted, fulfilled, supported and measured.
Days 15–30	Run tastings in 2–3 schools; recruit 50 trial families; test packing, manifests and delivery; collect verified feedback.	Delivery reliability and customer response meet pilot targets.
Days 31–60	Launch Chennai Search campaigns; activate school communications; promote weekly plans; review search terms and funnel weekly.	Acquisition cost and contribution margin are understood.
Days 61–90	Keep profitable keywords; improve weak landing pages; introduce retention and referral flows; onboard 2–3 additional schools.	Repeatable school onboarding and profitable retained demand.

Launch-day checklist

- | | |
|---|--|
| <ul style="list-style-type: none"> ☐ Ads lead only to serviceable pages ☐ Prices match checkout ☐ Menus and dates are current ☐ Phone and support inbox monitored ☐ Conversion test completed | <ul style="list-style-type: none"> ☐ Kitchen capacity confirmed ☐ School manifests tested ☐ Allergens displayed ☐ Refund path documented ☐ Ads policy review completed |
|---|--|

Source notes

- Google Responsive Search Ads: <https://support.google.com/google-ads/answer/7684791>
- Google web conversion setup: <https://support.google.com/google-ads/answer/16560108>
- Google ad-serving protections for children: <https://support.google.com/adspolicy/answer/14170968>
